[Production] This is the first production of Simon Creative under Storia. As part of the Storia Visual Novel franchise, it is focused on the visual novel style and uses a unique “business management” system where the game play is concentrated more around the management than the story. The storyline itself is filled with a lot of humorous events and we’ve handpicked the voice actors of well-known anime and video game to voice our main characters. [Main features] 1. Unique “Business Management” system Customers purchase the products but only at the end of the month Items can be purchased on credit Items can be refunded The business management system will help you view all the products and leads in a more streamlined and convenient manner. There are also a lot of handy features like how to calculate the income and expenses. 2. Rich and diverse chain of story events The story will be coming to a close after you complete all the events! 3. Multiple endings There are multiple endings depending on your choices and actions If you rush through the game too quickly, you won’t get all the endings. This also means that you won’t be able to get a 100% correct solution. All our evaluations were passed with over 95% correct guesses! The game ends with an entire package of methods and ways you can increase your score! *Tips* 1. If you have any trouble during the game, you can view the solution on the lesson homepage using the “Instructions” button 2. You can get all the answers to the evaluation questions and reviews when you access the lesson homepage using the “Solution” button 3. If you encounter any questions during the quiz, please take to Twitter to contact us 4. Please allow at least 20 minutes per session Chapters of the story: Part I: Part II: Part III: Prologue Main Characters Note: - If you’re using Vocaloid, please download the Vocaloid Zip file from here (This is Japanese so it might not work for everyone.
