
Release Code Circuit Wizard LINK

I have a serial number to apply on the initial installation and then when you open the program for the first time, it asks for an "unlock code". I did some searching and found that the only way to do this is to use the setscript method, but I can't find any information on how to do this. If anyone could provide me with any information that would help me, I would be very grateful. I am using Python 2.7.3. You can check the script for errors and fix them, then run it again. You can also
