Find answers to the most common questions you might have to help you with the integration of the Vocal Enhancer.

The Vocal Enhancer is an excellent choice for those who want to automatically increase the loudness of their vocals without losing any details. The Vocal Enhancer works by

breaking down the sound waves of a vocal recording and then reorganizing them in a way that is more conducive for the human ear. The result is a vocal recording that sounds more lifelike and natural. The Sound Adaptation tab contains settings that allow you to fine-tune the maximum output volume. Here you can adjust the amount of gain (in dB) that the Vocal

Enhancer will apply to your vocal recording. In addition, this setting is also used as a reference for the Vocal Enhancer's automatic gain control. Click on the Load... button to load the Vocal Enhancer into your plugin suite. Double click on the Vocal Enhancer in your plugin suite's Plugins folder to load the Vocal Enhancer into your browser.
